## Monday session

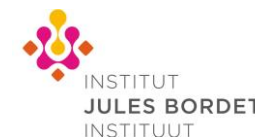

## “I.C. Green”

Monday, October 8, 2018

19 hrs

Auditoire Tagnon – Institut Jules Bordet  
121, Boulevard de Waterloo  
1000 Brussels – Belgium

**Session organizer:**  
**Pr. Gabriel Liberale**  
**Institut Jules Bordet**

Dear colleagues,

During this session, we will have the honor to welcome two experts in the field of ICG-Fluorescence imaging (ICG-FI): **Prof. Yves Van Nieuwenhove (Ghent) and Dr. Nicolas Golse (Paris)**

We have limited the meeting to three presentations, so we encourage interested surgeons using 'ICG-Fluorescence' in laparoscopic abdominal surgery to participate in the discussion and to share their own experience!

Gabriel Liberale  
BGES Board Member

**Yves Van Nieuwenhove** is chairman of the clinical sector Blood, Respiration, Digestion & Transplantation, Ghent University Hospital. Head of Clinic in the department of Gastrointestinal Surgery, Ghent University Hospital and Professor of Surgery at Ghent University.

**Nicolas Golse** is 'Praticien Hospitalier' at Paul-Brousse hospital (APHP, Villejuif-Paris, France) working in collaboration with professor Eric Vibert and René Adam. Nicolas is working on the role of ICG-FI in hepatic surgery.

**Gabriel Liberale** is Head of Clinic in the department of Surgery, Institut J.Bordet, and Professor of Surgery (Surgical Oncology) at Université Libre de Bruxelles.

## **PROGRAM**

19.00 Welcome drink and buffet.
